

Dear Secretary Daley:

I am writing to express my concern for the Steller sea lion population in western Alaska. The Steller sea lion population has undergone a dramatic decline that parallels the explosion of commercial pollock fishing in the Bering Sea and Gulf of Alaska. Pollock is the Steller sea lions' primary prey — and they simply cannot compete with industrial fishing fleets for the fish.

I urge you to demonstrate your department's commitment to the conservation of marine biodiversity by protecting the endangered Steller sea lion as follows:

- Extend no-trawl zones to 20 nautical miles around all Steller sea lion rookeries and haulouts listed as critical habitat;
- Keep factory trawlers out of an area known as the Catcher Vessel Operation Area, which overlaps extensively with critical habitat year-round;
- Spread the pollock fishery out geographically and throughout the year.

Sincerely,

NAME

*Tim McDonald, Jim McDonald*
